

Vendor: Oracle

Exam Code: 1Z0-528

Exam Name: Oracle Database 11g Security Essentials

Version: DEMO

QUESTION 1

Andrew works as a Database Administrator for Tech Mart Inc. The company uses Oracle 11g as the database server. Andrew has been assigned the task to apply a security feature to the database of the organization to protect the database from insiders. This security feature should also mitigate several security risks. Which of the following security features should he adopt to accomplish the task?

- A. Database Vault
- B. Advanced Security Option
- C. Enterprise Data Masking Pack
- D. Audit Vault

Answer: D

QUESTION 2

Which of the following is NOT a feature of the Data Masking Pack?

- A. Secure High Performance Mask Execution
- B. Comprehensive and Extensible Mask Library
- C. Automated patching for Oracle products and the operating system
- D. Sophisticated Masking Techniques

Answer: C

QUESTION 3

You are a Database Administrator in Dolliver Inc. Oracle 11g is installed as the database server in the company. You want to protect data from privileged users through some preventive controls and also secure the database transparently. Which of the following security options will you adopt to accomplish the task?

- A. Audit Vault
- B. Database Vault
- C. Advanced Security
- D. Enterprise Manager Data Masking Pack

Answer: B

QUESTION 4

You have a system installed with Oracle 11g. You are concerned about the security of the database instances in your system. You plan to use Oracle Database Vault to create several components to manage the security of the database instances. Which of the following components can be created using Oracle Database Vault? Each correct answer represents a complete solution. Choose all that apply.

- A. Factors
- B. Command rules
- C. Realms
- D. RMAN

Answer: ABC

QUESTION 5

Sam works as a Database Administrator for Company Inc. The company is using Oracle 11g as the database server. Sam wants to adopt a security feature on the database that enforces the security rules, regardless of the way the data is accessed. Which of the following security features should he adopt to accomplish the task?

- A. Real Application Cluster (RAC)
- B. Label Security
- C. Enhanced security features with execution context
- D. Virtual Private Database (VPD)

Answer: D

QUESTION 6

Andrew works as a Database Administrator for Tech Mart Inc. The company uses Oracle 11g as the database server and deals with the development of various database applications. During such developments, production data is copied into other non-production environments. This leads to several confidential risks. Andrew has been assigned the task to minimize the risk of handling such sensitive information. Which pack of Enterprise Manager should he adopt to accomplish the task?

- A. Oracle Diagnostic Pack
- B. Oracle Data Masking Pack
- C. Oracle Change Management Pack
- D. Oracle Configuration Management Pack

Answer: B

QUESTION 7

Which of the following components of Oracle Database Vault is a Java application that is built on top of the Oracle Database Vault PL/SQL application programming interfaces (API)?

- A. Oracle Database Vault Reporting and Monitoring Tools
- B. Oracle Database Vault Administrator (DVA)
- C. Oracle Database Vault DVSYS and DVF Schemas
- D. Oracle Database Vault Access Control Components

Answer: B

QUESTION 8

Which of the following are the advantages of Oracle Database Vault? Each correct answer represents a complete solution. Choose all that apply.

- A. It disables the separation of duty.
- B. It controls access to database and application data by highly privileged users.
- C. It imposes multi-factor authorization by the use of flexible business rules.
- D. It enables the separation of duty.

Answer: BCD

QUESTION 9

Which method should be adopted to retrieve all those rows whose sensitive columns have a null value and which are restricted by Virtual Private Database security?

- A. Column masking
- B. Access Control List
- C. Transparent Tablespace Encryption
- D. Transparent Data Encryption

Answer: A

QUESTION 10

David works as a Database Administrator for Gentech Inc. The company is using Oracle 11g as the database server. David wants to adapt such a security option that will provide no application changes to the database, built-in key management, and high performance to the database. Which security option should he adopt to accomplish the task?

- A. Database Vault
- B. Label Security
- C. Audit Vault
- D. Advanced Security Option

Answer: D

QUESTION 11

Which of the following options employs labeling concepts used by government and defense organizations to protect sensitive information and to provide data separation?

- A. Oracle Database Vault Security
- B. Oracle Advanced Security
- C. Oracle Audit Vault Security
- D. Oracle Label Security

Answer: D

QUESTION 12

Sam works as a Database Administrator for Gentech Inc. The company is using Oracle 11g as the database server. Sam wants to protect the company's data by encrypting the physical data files created on the operating system. Which of the following types of encryption should he use to accomplish the task?

- A. Transparent Data Encryption (TDE) for securefiles
