

Vendor: CIW

Exam Code: 1D0-571

Exam Name: CIW Web Security Associate

Version: DEMO

QUESTION 1

You have been asked to encrypt a large file using a secure encryption algorithm so you can send it via e-mail to your supervisor. Encryption speed is important. The key will not be transmitted across a network. Which form of encryption should you use?

- A. Asymmetric
- B. PGP
- C. Hash
- D. Symmetric

Answer: D

QUESTION 2

Which of the following is the most likely first step to enable a server to recover from a denial-of-service attack in which all hard disk data is lost?

- A. Enable virtualization
- B. Contact the backup service
- C. Contact a disk recovery service
- D. Rebuild your RAID 0 array

Answer: B

QUESTION 3

You purchased a network scanner six months ago. In spite of regularly conducting scans using this software, you have noticed that attackers have been able to compromise your servers over the last month. Which of the following is the most likely explanation for this problem?

- A. The network scanner needs to be replaced.
- B. The network scanner is no substitute for scans conducted by an individual.
- C. The network scanner has a trojan.
- D. The network scanner needs an update.

Answer: D

QUESTION 4

What is the primary use of hash (one-way) encryption in networking?

- A. Signing files, for data integrity
- B. Encrypting files, for data confidentiality
- C. Key exchange, for user authentication
- D. User authentication, for non-repudiation

Answer: A

QUESTION 5

Which of the following will best help you ensure a database server can withstand a recently discovered vulnerability?

- A. Updating the company vulnerability scanner and conducting a new scan
- B. Adding a buffer overflow rule to the intrusion detection system
- C. Reconfiguring the firewall
- D. Installing a system update

Answer: D

QUESTION 6

A security breach has occurred involving the company e-commerce server. Customer credit card data has been released to unauthorized third parties. Which of the following lists the appropriate parties to inform?

- A. Shareholders, law enforcement agencies and company employees
- B. Affected customers, credit card companies and law enforcement agencies
- C. The Internet Service Provider, ICANN and company shareholders
- D. External security consultants, company board members and affected customers

Answer: B

QUESTION 7

What is the primary drawback of using symmetric-key encryption?

- A. Key transport across a network
- B. Speed of encryption
- C. Denial-of-service attacks
- D. Inability to support convergence traffic

Answer: A

QUESTION 8

Which of the following is a typical target of a trojan on a Linux system?

- A. Kernel modules
- B. Shared libraries
- C. Boot sector files
- D. System32 DLL files

Answer: A

Thank You for Trying Our Product

PassLeader Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
