

Exam Code: HP0-922

Exam Name: Implementing & Supporting HP Storage
Essentials v5.1

Vendor: HP

Version: DEMO

Part: A

1: HP Systems Insight Manager and HP Storage Essentials provide server and storage management through a central management platform. Which functions are included? (Select three.)

- A.integrated security
- B.storage array configuration
- C.array discovery and identification
- D.access to storage on unmanaged hosts
- E.assignment of a new management server
- F.speed modification on Fibre Channel connections

Correct Answers: A B C

2: Which activities can be monitored with Storage Essentials? (Select two.)

- A.storage growth planning
- B.disaster recovery planning
- C.storage network traffic sniffing
- D.domain user rights identification
- E.underutilized storage identification

Correct Answers: A E

3: What is a recommended prerequisite for a hardware or software product to become HP Storage Essentials compliant?

- A.Fibre Channel support
- B.Windows 2000 or 2003 server platform
- C.HP Systems Insight Manager compatibility
- D.Storage Network Industry Association conformance

Correct Answers: D

4: Which statement about Storage Essentials Solution Service is correct?

- A.The product warranty is extended with Level 3.
- B.At least one level must be included in each quote.
- C.Storage Essentials is customer installable and all levels are optional.
- D.Software installation, configuration and testing are only included in Level 1.

Correct Answers: B

5: Which HP Storage Essentials features include direct attached storage? (Select two.)

- A.schedule of provisioning tasks
- B.display of ports in Performance Monitor
- C.display of connections in System Manager
- D.schedule of port performance data collection
- E.display of reachable ports in Path Provisioning

Correct Answers: A C

6: What extends HP Systems Insight Manager with additional SAN management and monitoring functionality?

- A. entering a new license key
- B. installation of SMI-S providers
- C. the CIM extension on managed hosts
- D. a CIMOM client enabled on the storage system

Correct Answers: B

7: What are the two components of the connector?

- A. SE Database connector which connects both HP SIM and HP Storage Essentials to the database
- B. ODBC connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM
- C. MySQL connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM
- D. Storage Essentials connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM

Correct Answers: D

8: Which infrastructure service is required on the central management server host to install Storage Essentials?

- A. CIM
- B. SNMP
- C. CIMOM
- D. SMI-S provider

Correct Answers: B

9: Which security feature protects the intercommunication of HP Systems Insight Manager (SIM), its clients, and its users?

- A. Secure Shell based scripting is limited to UNIX platforms.
- B. HP-signed Secure Socket Layer certificates ensure authenticity.
- C. Secure Task Execution limits access from specific HP SIM servers.
- D. Secure Shell known_hosts files contain a list of discovered servers.

Correct Answers: C

10: What is a characteristic of HP Systems Insight Manager with regard to open system management platform design?

- A. It may be extended by using third party plug-ins.
- B. It is licensed for exclusive use with HP components.
- C. It supports only HP platforms, whereas any platform integrates with HP OpenView.
- D. It primarily uses SNMP to contact devices; other connection methods are optional and must be purchased.

Correct Answers: A

11: What are steps of the HP Storage Essentials discovery process? (Select three.)

- A.Detail Scan: Scan for SAN topology, backup topology, and all available volumes.
- B.Unlock: At the end of the discovery, data flow in the storage network is re-enabled.
- C.Setup: Before the initial scan starts, an IP address or an IP address range must be specified.
- D.Topology Scan: On the second scan after initial scan, a tree shows all dependencies between devices.
- E.Hardware Scan: After the detail scan completes, a hardware scan identifies all available resources.
- F.License Scan: After the hardware scan completes, a scan identifies all licensed and unlicensed server applications.

Correct Answers: A C D

12: What are optional HP Storage Essentials plug-ins? (Select three.)

- A.Policy Viewer
- B.Oracle Viewer
- C.Sybase Viewer
- D.Chargeback Manager
- E.Performance Manager
- F.Global Database Viewer

Correct Answers: B C D

13: Which databases can be used by HP Systems Insight Manager? (Select two.)

- A.DB2
- B.Oracle
- C.Sybase
- D.PostgreSQL
- E.Microsoft SQL

Correct Answers: B E

14: Which component ensures HP Systems Insight Manager/Storage Essentials synchronization?

- A.CIMOM
- B.connector
- C.SMI-S interface
- D.dedicated transaction manager

Correct Answers: B

15: The security architecture of HP Systems Insight Manager (SIM) is designed to protect data and software functions from unauthorized access. What is a key feature of SIM security?

- A.built-in accounts
- B.preconfigured trusts
- C.role based associations
- D.proprietary transport protocols

Correct Answers: C
