

**Vendor:** Apple

**Exam Code:** 9L0-521

**Exam Name:** Mac OS X Server Essentials 10.9 Exam

**Version:** DEMO

### QUESTION 1

Review the screenshot from FileVault preferences, and then answer the question below.

If you click Enable User for the Logan White account, what is the effect?

- A. FileVault 2 is enabled immediately for the Logan White account, and FileVault begins encrypting the Logan White home folder.
- B. You are prompted immediately to enter the login password for the Logan White account, after which, Logan White will be able to unlock and decrypt the system disk, and restart the computer.
- C. You are prompted immediately to enter an administrator password, after which, the user of the Logan White account will be able to unlock and decrypt the system disk, and restart the computer.
- D. At next login, the user of the Logan White account will be prompted to enter the login password, after which, the user will be able to unlock and decrypt the system disk, and restart the computer.

**Answer: B**

### QUESTION 2

In order to sign a configuration profile, which steps must you complete?

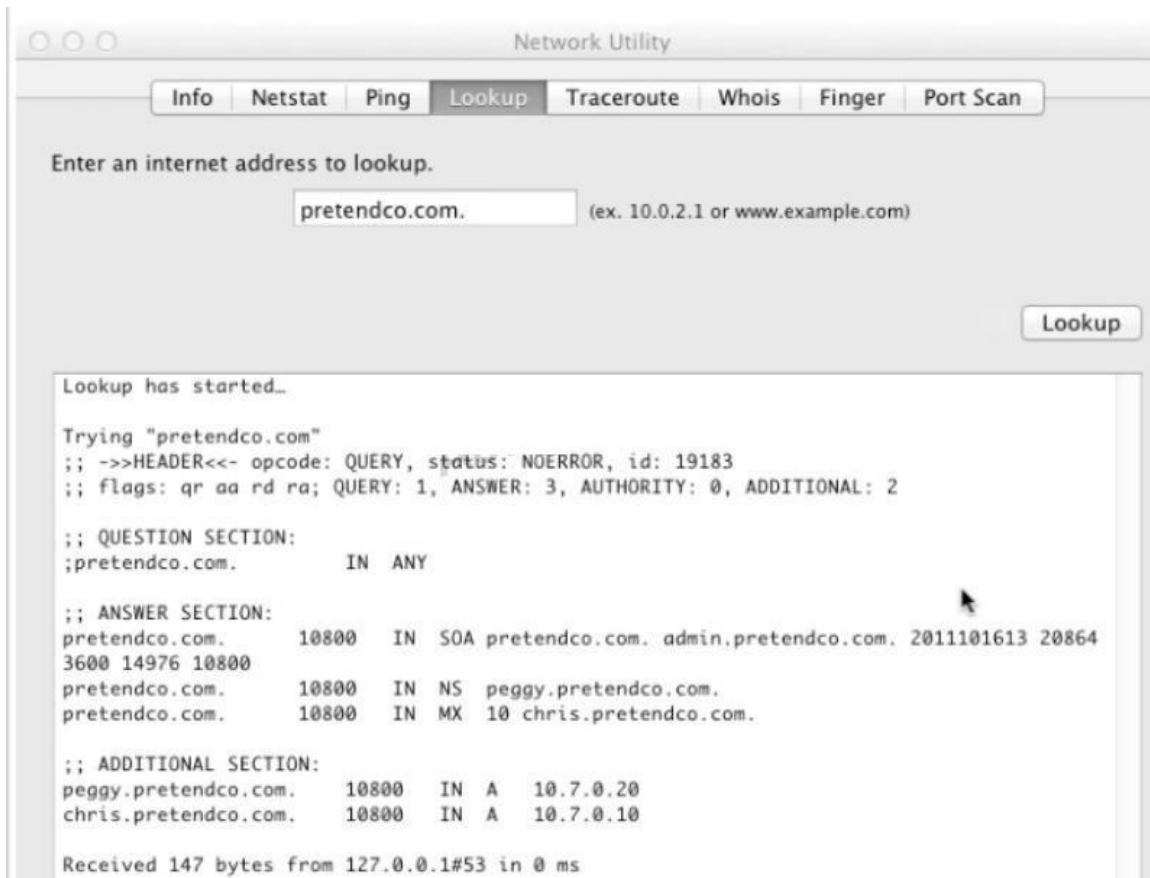

- A. In the Profile Manager service in Server app, select "Sign configuration profiles" and choose a valid code-signing SSL certificate.
- B. In the Profile Manager web app, select "Sign configuration profile" and choose a valid code-signing SSL certificate.
- C. In the Profile Manager service in Server app, select "Sign configuration profiles" and choose a valid Apple Push Notification service certificate.
- D. In the Profile Manager web app, select "Sign configuration profiles" and choose a valid Apple Push Notification service certificate.

**Answer: A**

### QUESTION 3

Review the screenshot, and then answer the question below.

What is the DNS name of the mail server for pretendco.com?

- A. chris.pretendco.com
- B. admin.pretendco.com
- C. pretendco.com
- D. peggy.pretendco.com

**Answer: AD**

**Explanation:**

As you can see that these two names have proper IP addresses that correspond to them being the DNS servers. Peggy.pretendco.com is primary and chris.pretendco.com is secondary DNS server.

**QUESTION 4**

Using AFP, you copy a file from your Mac into the shared folder shown above.

Members of the staff group report that they are unable to edit the file.

Assuming no ACLs have been configured, what is the MOST LIKELY reason for this issue?

- A. Everyone permissions apply to the staff group because the staff group's GIO has been changed.
- B. The file is locked.
- C. Members of the staff group do not have write access to /tmp/\_cathes on the server.
- D. The group permission for the file is set to read-only.

**Answer: D**

**Explanation:**

As you can see that the staff has Read Only permission. They can never edit the files because they don't have Read & Write permission. It is only granted to Chris who is the administrator.

**QUESTION 5**

Which protocol does the Messages service in OS X Server use to send messages?

- A. SMP (Symmetric Messaging Protocol)
- B. XMPP (Extensible Messaging and Presence Protocol)
- C. AIMP (AOL Instant Messaging Protocol)
- D. IRC (Internet Relay Chat)

**Answer: B**

**Explanation:**

<http://xmpp.org/xmpp-software/servers/>

**QUESTION 6**

Which application can you use to enable the Software Update service in OS X Server?

- A. Server app
- B. Profile Manager
- C. Server Admin
- D. Software Update Utility

**Answer:** A

**Explanation:**

<http://support.apple.com/kb/HT5383>

#### QUESTION 7

You are configuring NFS export settings for a share point that resides on a Mac OS X Server v10.9 computer.

What does the "All to Nobody" mapping do?

- A. It prohibits export of items and contents to users.
- B. It creates the group, "Nobody", that will be used for NFS access.
- C. It tells the NFS server to identify all users by their client settings.
- D. It provides all NFS users with the same file privileges as the "nobody" account.

**Answer:** D

#### QUESTION 8

You have configured the folder at /Shared Items/Documents/ as an NFS share point on your Mac OS X Server at server.pretendco.com. Which URL should you provide to Mac OS X users to allow them to access the share point?

- A. <nfs://server.pretendco.com/>
- B. <nfs://documents.server.pretendco.com/>
- C. <nfs://server.pretendco.com/Documents/>
- D. <nfs://server.pretendco.com/Shared Items/Documents/>

**Answer:** D

#### QUESTION 9

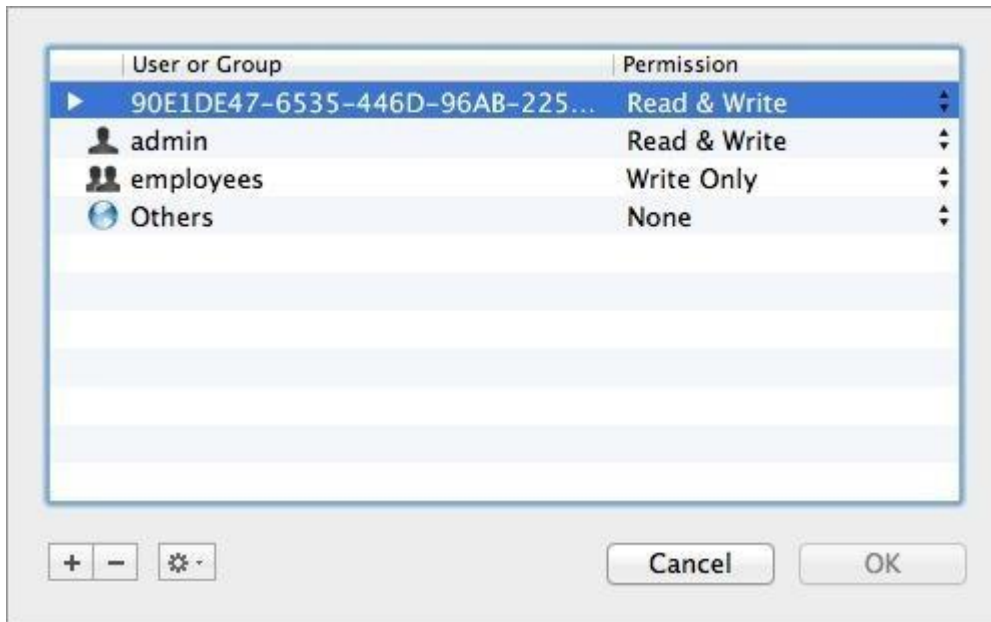

What protocol does the Mail application in Mac OS X v10.9 use to send email from a client computer to a mail server for delivery?

- A. POP
- B. IMAP
- C. LDAP
- D. SMTP
- E. XMPP

**Answer:** D

#### QUESTION 10

Review the screenshot of the permission settings for a file, and then answer the question below.

Which statement best explains the text in the "User or Group" field of the highlighted entry?

- A. A Windows group has read/write access.
- B. A user or group has been deleted.
- C. The file has not been indexed by Spotlight.
- D. A guest user is logged in.

**Answer: B**

#### QUESTION 11

You have set up multiple mail servers to receive email for your company.

Which DNS record specifies the hostname of the mail server whose availability should be checked first when mail is being routed to an employee?

- A. The A record with the priority number that is lowest
- B. The A record with the priority number that is highest
- C. The MX record with the priority number that is lowest
- D. The MX record with the priority number that is highest
- E. The PTR record with the priority number that is lowest
- F. The PTR record with the priority number that is highest

**Answer: C**
