- A. kits
- B. returns
- C. internal orders
- D. retro bill orders
- E. ATO/PTO models
- F. standard orders with service items
- G. standard orders with standard items

Answer: AEFG

QUESTION 9

Company ABC has a factory that is set up as an inventory organization with several subinventories. Each of the subinventories has locators. The factory purchases material using a purchase order. The person who receives the purchase order does not know which subinventory and locator the material needs to go to. ABC wants the subinventory and locator to be automatically populated for that item. Which option would solve the problem?

- A. Populate the completion subinventory and locator on the routing for that item.
- B. Use the restrict subinventory and restrict locator flag on the Item Master record of that item.
- C. Populate the supply subinventory and locator fields on the Item Master record for the purchased item.
- D. Use the Item Transactions Default form to create default subinventory and locators for the purchased item.

Answer: D

QUESTION 10

You are the warehouse manager for a distributor of electronics equipment. A customer service representative wants you to expedite the shipping of order number 16428 for one of your very important customers. You go to Oracle Shipping execution to view the order status in the Shipping Transactions form. The products requested on this order do not need any packing. View the Exhibit and choose the appropriate action.

- A. Go to Actions > Auto-Pack.
- B. Go to Actions > Autocreate Trip.
- C. Go to Actions > Assign To Deliveries.
- D. Go to Actions > Launch Pick Release.
- E. Go to Actions > Unassign From Deliveries.

Answer: D

QUESTION 11

Answer: E

QUESTION 12

Your client manufactures and sells material from four different manufacturing locations. The client has these requirements:

Requirement 1:

When a customer calls to return a product, the client needs to know which plant produced the material.

Requirement 2:

Product manufactured within a plant needs to be tracked uniquely.

Which criteria would meet the clients needs?

- A. Set up lot control at the organization level and use a prefix.
- B. Set up lot control at the item level and use a prefix for the lot number.
- C. Create one locator for each product and produce the item to that locator.
- D. Create part numbers for each customer to know which part number is ordered.

Answer: A

QUESTION 13

Which three statements are true about the Move Order process? (Choose three.)

- A. Requisition and pick release orders are pre-approved.
- B. Replenishment and pick wave move orders are pre-approved.
- C. Requisition and pick release orders are pre-approved and require inspection.
- D. If no planner is specified for the item, the requisition line is automatically approved.
- E. If no approvals are required in your organization, set the inventory organization parameters Timeout Period to 0 and the Timeout Action to Approve Automatically.

Answer: BDE

QUESTION 14

Select the four correct statements. (Choose four.)

- A. A receiving subinventory is required in Oracle.
- B. A subinventory can span multiple organizations.
- C. A subinventory cannot be used with Locator Control.
- D. A subinventory can be a physical or a logical grouping.
- E. A subinventory location is required for all inventory transactions.
- F. A subinventory can be the primary place where items are stocked.
- G. A subinventory location can never be deleted from the Oracle inventory.

Answer: DEFG

QUESTION 15

Which statement is true about delivery lines?

- A. Delivery lines cannot be split in shipping transactions.
- B. Delivery lines cannot be shipped on the same delivery if they are from different orders.
- C. Delivery lines must be booked and scheduled in Order Management in order to appear in shipping transactions.
- D. Delivery lines that have been assigned to a delivery must be back-ordered in order to assign a different delivery number.

Answer: C

QUESTION 16

You are implementing Oracle Inventory for XYZ Motor Mfg (XYZ). XYZ want to track all the motors shipped to customer ABC. They would like to generate and assign a unique number for each motor during the sales order shipment. This would be useful for them to track the motors easily during the return process. What is the setup or process to achieve this objective?

- A. Enable lot control at the item level. Prefix the lot with AB and ship those lots to ABC customer.
- B. Enable serial control at the organization item level. Prefix serial with AB. Set up serial generation at receipt.
- C. Enable serial control at the organization item level. Prefix serial with AB. Set up serial generation as no control.
- D. Enable serial control at the organization item level. Prefix serial with AB. Set up serial generation as predefined.
- E. Enable serial control at the organization item level. Prefix serial with AB. Set up serial generation at the sales order issue.

Answer: E

QUESTION 17
