Vendor: Cisco

Exam Code: 650-296

Exam Name: TelePresence Video Sales Engineer for Advanced Exam (PATVSEA)

Version: DEMO

QUESTION 1
Why is Cisco TelePresence Interoperability Protocol (TIP) needed in a network?

A. It allows CTS endpoints and other other devices that can only with two media streams to connect
B. It permits audio and video streams to be transmitted across the WAN
C. It allows for multiple video and audio conferences to be conducted simultaneously
D. It allows for standard-definition video conference streams to be converted up to 1080p

Answer: A

QUESTION 2
How does a VCS Expressway solution work?

A. Packets sent through a firewall are tagged by the VCS Expressway and Control, so they can travel through any port
B. The VCS Control and Expressway have manually configured IP address and ports that the firewall has opened in both directions
C. Packets from the VCS Expressway to the VCS Control are only sent on the return path of an outbound connection
D. All incoming data sent through the VCS Expressway is delivered to the VCS Control through a single port

Answer: C

QUESTION 3
When sizing gateways, what determines the number of PRIs required?

A. the peak number of gatekeeper registrations
B. the maximum permitted call rate
C. the call rate and peak number of ISDN calls
D. the videoconferencing protocol required

Answer: C

QUESTION 4
What type of license is required for a major software version upgrade?

A. call license
B. option key
C. release key
D. support license

Answer: C

QUESTION 5
What is the effect of a multipoint control unit service prefix on the function of the VCS?

A. The VCS will only search neighbor zones that have the multipoint control unit service prefix in their configuration

B. The VCS will always search neighbor zones if a prefix is induded
C. The VCS will route all calls beginning with the prefix to the multipoint control unit
D. The service prefix will be added to all VCS registrations

Answer: C

QUESTION 6
When a VCS receives a call request, it searches for the endpoint. What does the pattern-matching in a search determine?

A. whether the call is permitted
B. the zones that have been searched by others
C. whether the zone should be searched for this endpoint
D. the available zones

Answer: C

QUESTION 7
What is the primary purpose of the Cisco TelePresence Interoperability Protocol (TIP)?

A. It allows IP and ISDN endpoints to communicate with each other
B. It multiplexes multiple video and audio streams into a single audio and single video stream
C. It is used to allow video and voice calls to traverse the firewall
D. It allows SIP and H.323 endpoints to communicate with each other

Answer: B

QUESTION 8
Which two statements are correct when describing the VCS Expressway solution? (Choose two)

A. The VCS Expressway is located outside the network and acts as the firewall
B. The VCS Control works with existing firewalls to determine which traffic is allowed to pass to the VCS Expressway
C. The VCS Control is on the private network that acts as the firewall traversal client
D. The VCS Control is located outside the network and acts as the firewall traversal server
E. The VCS Expressway is traversal-enabled endpoint on the private network that acts as the firewall traversal client

Answer: AC

Thank You for Trying Our Product

PassLeader Certification Exam Features:

★ More than 99,900 Satisfied Customers Worldwide.

★ Average 99.9% Success Rate.

★ Free Update to match latest and real exam scenarios.

★ Instant Download Access! No Setup required.

★ Questions & Answers are downloadable in PDF format and
VCE test engine format.

★ Multi-Platform capabilities - Windows, Laptop, Mac, Android, iPhone, iPod, iPad.

★ 100% Guaranteed Success or 100% Money Back Guarantee.

★ Fast, helpful support 24x7.
