

Vendor: HP

Exam Code: HP2-K21

Exam Name: Designing HP Enterprise Storage Solutions -
Delta

Version: DEMO

QUESTION 1

Your customer is looking to implement replication between three D2D devices. Which statement is true about licensing the replication functionality of the D2D?

- A. A replication license is required for both the source and the target devices
- B. A replication license is required for the target devices
- C. Replication functionality is included as part of the base firmware and is not licensed
- D. A replication license is only required for the source device.

Answer: D

QUESTION 2

Your customer has two D2D2501 devices each with a single VTL configured and a D2D4112 with two VTLs configured, each replicating to a D2D4312. How many replication licenses are required for this design?

- A. 1 license
- B. 2 licenses
- C. 3 licenses
- D. 4 licenses

Answer: D

QUESTION 3

Which statement is true about using Performance Advisor to gather P9500 performance data?

- A. One collection schedule can be created per array.
- B. Two collection schedules can be created per array
- C. Three collection schedules can be created per array
- D. Four collection schedules can be created per array

Answer: A

QUESTION 4

The StorageWorks P4000 SAN architecture consists of three basic layers. Which function or component is contained in the OS infrastructure layer?

- A. Security Services
- B. Centralized Management Console
- C. Windows Solution Pack
- D. P4000VSA

Answer: C

QUESTION 5

Which statement is true about iSCSI clusters when implemented on a P4000?

- A. It can only span one subnet
- B. It can only span two subnets

- C. It can only span three subnets
- D. It can only span four subnets

Answer: B

QUESTION 6

Which P4000 features does a Multi-site SAN offer that a Campus SAN does not? (Select two.)

- A. multi-subnet clusters
- B. centralized licensing
- C. I/O preferencing based on site
- D. auto failover and tailback
- E. SAN1Q Failover Manager

Answer: AD

QUESTION 7

On the X1000 and X3000 Network storage systems, which standard feature of Windows 2008 optimizes storage capacity by actively comparing and eliminating identical files on file sharing volumes?

- A. dynamic deduplication
- B. StofeOnce
- C. accelerated deduplication
- D. Single Instance Storage

Answer: D

QUESTION 8

Autonomic tiering provides a self-optimizing capability for which HP array?

- A. HP EVA
- B. HP3PAR
- C. HP P4000
- D. HPX9000

Answer: B

QUESTION 9

Your customer is considering the HP 3PAR range of arrays and is concerned about resilience. Which feature provides increased resiliency?

- A. write-thru cache
- B. disk-dependent RAID
- C. dynamic optimization
- D. many-to-many drive rebuild

Answer: D

Thank You for Trying Our Product

PassLeader Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
