

**Vendor:** SOA

**Exam Code:** S90-08A

**Exam Name:** Advanced SOA Design & Architecture

**Version:** DEMO

**QUESTION 1**

Each service composition within a service inventory shares the same service composition architecture.

- A. True
- B. False

**Answer: B**

**QUESTION 2**

The scope and size of different service inventory architectures can vary.

- A. True
- B. False

**Answer: A**

**QUESTION 3**

Which of the following statements is false?

- A. Widespread use of the Messaging Metadata pattern can be seen in the emergence of many WS-\* extensions that define industry standard SOAP header blocks that carry metadata.
- B. Messaging frameworks and technologies need to provide support for the reading and writing of message headers or properties in order to fully support the application of the Messaging Metadata pattern.
- C. The Messaging Metadata pattern is not applicable to situations where the message sender and receiver need to participate in stateful or conversational message exchanges.
- D. The Messaging Metadata pattern can support the application of patterns such as Intermediate Routing by supplementing messages with activity-specific metadata.

**Answer: C**

**QUESTION 4**

A service agent has a technical contract that allows it to be explicitly invoked by service consumer programs.

- A. True
- B. False

**Answer: B**

**QUESTION 5**

The application of the Contract Centralization pattern requires that runtime access policies be implemented.

- A. True
- B. False

**Answer: B**

**QUESTION 6**

Which of the following statements is false?

- A. The Contract Centralization pattern positions the service contract as the official entry point into the service logic.
- B. The Contract Centralization pattern can impose performance overhead and requires the use of design standards.
- C. The application of the Contract Centralization pattern enables access to underlying service resources through the use of secondary or unofficial technical contracts.
- D. The Decoupled Contract pattern supports the application of the Contract Centralization pattern.

**Answer:** C

**QUESTION 7**

Which of the following statements is true?

- A. The overuse of service agents can lead to dependencies on proprietary vendor platforms.
- B. The use of service agents is limited to the service architecture.
- C. Service agents are common in orchestration environments but not within enterprise service bus environments.
- D. None of these statements are true.

**Answer:** A

**QUESTION 8**

Governance can become an issue with service agents because:

- A. You will need to determine who will own and maintain the service agents.
- B. Changes to a single service agent can impact multiple services throughout a service inventory.
- C. Service agents need to be versioned, just like services.
- D. All of the above.

**Answer:** D

**QUESTION 9**

Which of the following patterns may also require the application of the Service Agent pattern?

- A. Reliable Messaging
- B. Asynchronous Queuing
- C. Intermediate Routing
- D. Policy Centralization

**Answer:** ABCD

**QUESTION 10**

Which statement regarding intermediate routing is true?

- A. The application of the Intermediate Routing pattern is suitable for handling message routing

requirements that are dynamic in nature and difficult to anticipate in advance.

- B. The application of the Intermediate Routing pattern is suitable for handling pre-determined message paths with fixed routing requirements that cannot be changed at runtime.
- C. The application of the Intermediate Routing pattern tends to improve runtime performance when compared to an approach whereby routing logic is embedded within individual services.
- D. None of these statements are true.

**Answer:** A

#### **QUESTION 11**

The application of the Intermediate Routing pattern can address which of the following needs?

- A. The need to increase the autonomy of a service due to its reliance on a shared data source.
- B. The need to perform content-based routing based upon metadata found in the message header.
- C. The need for load-balanced access to a redundantly deployed service.
- D. The need to provide pre-defined compensating logic for when an atomic service transaction fails.

**Answer:** BC

#### **QUESTION 12**

Load balancing is commonly associated with which pattern?

- A. Atomic Service Transaction
- B. Intermediate Routing
- C. Service Broker
- D. Decoupled Contract

**Answer:** B

## Thank You for Trying Our Product

### PassLeader Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad.**
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
