

**Vendor:** RSA Security

**Exam Code:** 050-v71-CASECURID02

**Exam Name:** RSA SecurID Certified Administrator 7.1 Exam

**Version:** DEMO

**QUESTION 1**

An RSA SecurID tokencode is unique for each successful authentication because

- A. a token periodically calculates a new code
- B. the user continuously changes their secret PIN
- C. the Node Secret is updated after each authentication
- D. the Server's clock is set to Universal Coordinated Time (UTC)

**Answer:** A

**QUESTION 2**

RSA SecurID tokens are initially supplied with matching token records. After tokens are assigned, deployed and used by end-users, what information might be overwritten if the original token records are re-imported into the RSA Authentication Manager database.? (Choose two)

- A. user assignment
- B. tokencode values
- C. Authentication Agent usage
- D. token time offset information
- E. system PIN parameter settings

**Answer:** AD

**QUESTION 3**

A user reports a problem while trying to authenticate. The administrator checks recent activities and sees that the last message associated with this user is "New Pin Cancelled." What is the most likely cause?

- A. The user is not in New PIN mode.
- B. The user is not in the server database.
- C. The user did not complete the New PIN operation successfully.
- D. The user is not authorized to authenticate through this Authentication Agent.

**Answer:** C

**QUESTION 4**

When assigning a user a Temporary Fixed Tokencode to replace a lost token, what is the default value for the expiration period of that Tokencode?

- A. 24 hours
- B. 5 days
- C. 14 days
- D. 30 days

**Answer:** C

**QUESTION 5**

A user is trying to authenticate from their workstation to the RSA Authentication Manager but

receives an "Access Denied" message. The Server's log is showing the following error message: "Node secret mismatch". What is a likely cause?

- A. The sdconf.rec is missing from the Agent machine.
- B. The user is not allowed to authenticate on that Agent.
- C. The Agent has not been added into the Server database.
- D. The secret key used to encrypt Agent communication has been deleted.

**Answer: D**

#### **QUESTION 6**

Operation between Windows, Linux and UNIX platforms is supported by RSA Authentication Manager for which types of communications? (Choose two)

- A. Agent to Server
- B. Database Replication
- C. Primary to Replica Server
- D. Trusted Realm authentication
- E. Database server to Server Node

**Answer: AD**

#### **QUESTION 7**

Three consecutive log entries for one user contain the message "Authentication Method Failed", what administrative action would NOT be appropriate?

- A. resynchronize the token
- B. set the user's PIN to Next Tokencode
- C. assign a temporary Fixed Passcode for troubleshooting
- D. check the system time of the RSA Authentication Manager host

**Answer: B**

#### **QUESTION 8**

An RSA Authentication Manager administrator would edit an Identity Attribute parameter

- A. to ignore users with duplicate user names.
- B. to store additional user information in a user record.
- C. to specify an LDAP Bind DN and Bind DN password.
- D. when the LDAP server is not in the same domain as the RSA Authentication Manager server.

**Answer: B**

#### **QUESTION 9**

If the RSA Authentication Manager places a token into Next Tokencode Mode, and the user waits for three minutes (three tokencode increments) to enter his/her next tokencode, what will be the expected result?

- A. The Server will not accept the value because it is not sequential.
- B. The authentication will be successful even though the input was delayed.
- C. The Server will ask for a third tokencode, so that it has two sequential codes.
- D. The Server will assume that the token has been stolen, and disable the token.

**Answer:** A

**QUESTION 10**

If a group has been defined with access times of 9 AM to 5 PM, Monday through Friday. When can a member of that group log in?

- A. at any time but must renew their login at 9 AM each day
- B. during the specified time frame, but must log out by 5 PM
- C. during that time frame and can remain logged in indefinitely
- D. during that time frame but is automatically logged out at 5 PM

**Answer:** C

**QUESTION 11**

When creating and running RSA Authentication Manager version 7.1 reports, the administrator has the option of (Choose two)

- A. allowing the report to run with the scope of the administrator who is running the report.
- B. defining report criteria by writing an SQL query to extract data directly from the database.
- C. customizing a report template by adding and removing columns and applying data filters.
- D. creating and running reports from a Replica database server if the Primary server is down.
- E. previewing the report output before the report is run to make sure the desired data is included.

**Answer:** AC

**QUESTION 12**

Authenticators should NOT be shared by multiple users because of

- A. license concerns.
- B. hostname conflicts.
- C. database restrictions.
- D. repudiation concerns.

**Answer:** D

**QUESTION 13**

If multiple users request On-demand Tokencodes but are not receiving them, you would want to confirm that

- A. the users are not in New PIN mode.
- B. SMS or SMTP services are configured correctly.
- C. the tokens assigned to the users have not expired.
- D. the tokens assigned to the users have been resynchronized.

**Answer: B**

**QUESTION 14**

The RSA Authentication Manager has settings where (by default) three incorrect PASSCODES will invoke Next Tokencode Mode. Where is this configuration setting located?

- A. Within the Setup menu.
- B. Within the Identity menu.
- C. Within the Policies menu.
- D. Within the RADIUS menu.

**Answer: C**

**QUESTION 15**

You are assisting a user who is working offline on a Microsoft Windows Authentication Agent. If you provide this user with an Offline Emergency Passcode, you must tell the user

- A. to use the code in place of the RSA SecurID token passcode without using a PIN.
- B. to use the code in place of the RSA SecurID tokencode but continue to use the existing PIN.
- C. to use the code in place of the RSA SecurID tokencode but you will also issue a temporary replacement PIN.
- D. to first enter their Windows password and, when prompted for the Emergency Access Code, enter the code that you provide.

**Answer: A**

## Thank You for Trying Our Product

### PassLeader Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad.**
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
