

Vendor: Symantec

Exam Code: 850-001

Exam Name: Cloud Security 1.0

Version: DEMO

QUESTION 1

Which action addresses a risk inherent to the public cloud model?

- A. harden applications sufficiently for multi-tenant environments
- B. revert a public cloud to a private cloud during an emergency
- C. apply anti-spam measures on the endpoint accessing the cloud
- D. activate deduplication on the cloud-based storage

Answer: A

QUESTION 2

A company has decided to implement "cloud bursting" to allow their production environment to scale to any size by utilizing on-demand connections to a public cloud IaaS infrastructure. Which solution allows the IT department to protect against VM hopping?

- A. data loss prevention
- B. anti-virus / anti-spam
- C. data and mail encryption
- D. host intrusion prevention

Answer: A

QUESTION 3

A current customer's cloud service provider is undergoing a merger and acquisition process. This increases the likelihood of a strategic shift to the customer's business operations and may put non-binding agreements at risk, as well as make compliance with security requirements impossible. How is this cloud provider acquisition risk categorized?

- A. policy and organizational
- B. technical
- C. lock-in
- D. non-cloud specific

Answer: A

QUESTION 4

A cloud service provider administrator has discovered that someone is attempting to determine which servers and operating systems are running on a tenant's network by using network mapping. How is this risk categorized?

- A. policy and organizational
- B. technical
- C. legal
- D. non-cloud specific

Answer: B

QUESTION 5

A cloud customer has determined that their data is being held in multiple geographic locations. They are concerned that these sites will be raided by local authorities and their data or systems are subject to disclosure or seizure. Which risk category does this type of risk fall into?

- A. policy and organizational
- B. technical
- C. legal
- D. non-cloud specific

Answer: C

QUESTION 6

An IT security professional at a large US-based manufacturing company has decided to deploy and manage a host intrusion detection solution to assist with their migration to a cloud environment. Which cloud environment will benefit from this solution?

- A. multi-tenant SaaS
- B. hybrid SaaS
- C. multi-tenant IaaS
- D. multi-tenant PaaS

Answer: C

QUESTION 7

In order to achieve greater scalability, a CIO has mandated that a specific set of processes and data move to a cloud environment. These assets include: - Company email requiring anti-spam protection - Proprietary database with specific infrastructure requirements - Point-of-sale application and process for retail purchases. Which service and deployment model could support all of these assets?

- A. Infrastructure as a Service, hosted in a private cloud
- B. Platform as a Service, hosted in a public cloud
- C. Software as a Service, hosted in a private cloud
- D. Software as a Service, hosted in a public cloud

Answer: A

QUESTION 8

A company is moving to the cloud. Because of DDOS attacks, it would like to start by moving email to the cloud. The company is small, with fewer than 200 users. What is the most cost-effective deployment model for this company to begin using?

- A. IaaS community
- B. IaaS public
- C. PaaS hybrid
- D. SaaS public

Answer: C

QUESTION 9

Several government agencies collaborate extensively, sharing a variety of tools, processes, and data. Data shared by the organizations is highly sensitive, and risk tolerance for data loss or exposure is extremely low. Which type of cloud solution is appropriate in this scenario?

- A. internally-hosted infrastructure providing a community cloud
- B. internally-hosted infrastructure providing a private cloud
- C. externally-hosted infrastructure providing a community cloud
- D. externally-hosted infrastructure providing a private cloud

Answer: A

QUESTION 10

A large enterprise that is currently supported by a very large IT infrastructure and experienced staff would like to offer individual Business Units (BUs) the ability to use local servers and storage on an as-needed basis. The BUs would then be charged accordingly, based on their individual usage. Which cloud service and deployment model combination provides an appropriate solution?

- A. Platform as a Service, public cloud
- B. Platform as a Service, private cloud
- C. Infrastructure as a Service, public cloud
- D. Infrastructure as a Service, private cloud

Answer: D

Thank You for Trying Our Product

PassLeader Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
