

**Exam Code:** HP0-D04

**Exam Name:** Planning and Designing HP Enterprise  
Solutions

**Vendor:** HP

**Version:** DEMO

## **Part: A**

1: A customer environment includes Windows servers and HP EVA storage solutions. The customer wants to replicate the data from one business application to another site, and is looking for the lowest-cost option. Which HP StorageWorks product should you recommend?

- A.Storage Mirroring software
- B.Replication Solution Manager
- C.Business Copy EVA
- D.Continuous Access EVA

**Correct Answers: A**

2: Which HP tool contains an intelligent policy engine that automatically allocates resources among multiple workloads in an HP-UX and OpenVMS environment?

- A.HP Process Resource Manager
- B.HP Systems Insight Manager
- C.HP Global Workload Manager
- D.HP-UX Workload Manager

**Correct Answers: C**

3: Which HP technology allows busy servers to "borrow" power usage rights from idle servers?

- A.Insight Power Manager
- B.Power Regulator
- C.Dynamic Power Capping
- D.Rack and Power Manager

**Correct Answers: C**

4: Click the Task button.

Match the customer need to the HP solution provided by the EFS Clustered Gateway.

Match the customer need to the HP solution provided by the EFS Clustered Gateway.

**Customer need**

File server sprawl has created a costly management problem with more surface area to manage

place here

File servers are underutilized and inefficient, replicating many copies of the same data

place here

NAS appliances do not scale beyond a single system, creating silos of data to manage

place here

Many file serving projects have become mission critical

place here

**HP Solution**

Integrate high availability and data protection, with built-in failover and snapshots integrated with HP EVA

Optimize server/storage utilization by adding capacity as needed, without downtime, through easy tools

Consolidate servers and storage by at least 50% to a single point of management and single backup job

Scale performance by adding servers and storage to the cluster, in granular units

Done

**Correct Answers:**

Match the customer need to the HP solution provided by the EFS Clustered Gateway.

**Customer need**

File server sprawl has created a costly management problem with more surface area to manage	Consolidate servers and storage by at least 50% to a single point of management and single backup job
File servers are underutilized and inefficient, replicating many copies of the same data	Optimize server/storage utilization by adding capacity as needed, without downtime, through easy tools
NAS appliances do not scale beyond a single system, creating silos of data to manage	Scale performance by adding servers and storage to the cluster, in granular units
Many file serving projects have become mission critical	Integrate high availability and data protection, with built-in failover and snapshots integrated with HP EVA

**HP Solution**

Integrate high availability and data protection, with built-in failover and snapshots integrated with HP EVA	Optimize server/storage utilization by adding capacity as needed, without downtime, through easy tools
Consolidate servers and storage by at least 50% to a single point of management and single backup job	Scale performance by adding servers and storage to the cluster, in granular units

5: Which operating systems are supported by HP Virtual Server Environment to run as a virtual machine guest on Integrity servers? (Select three.)

- A. OpenVMS
- B. HP-UX
- C. NonStop Kernel
- D. Netware
- E. Linux
- F. Windows

**Correct Answers: B E F**
