

**Exam Code:** HP0-703

**Exam Name:** Tru64 UNIX V5 Network Administration

**Vendor:** HP

**Version:** DEMO

## Part: A

1: What does this entry in gated.conf mean?

```
# rip yes ;{nobroadcast ;};  
#
```

- A.gated listens for rip updates and sends them out
- B.gated behaves like routed -q
- C.gated runs once, listens for routes and terminates
- D.gated fails because the shell is not defined

**Correct Answers: B**

2: Which protocol does gated use to advertise routes?

- A.ARP
- B.RIP
- C.TFTP
- D.ICMP

**Correct Answers: B**

3: Which type of host should not use routed?

- A.server
- B.workstation
- C.external gateway
- D.departmental router

**Correct Answers: C**

4: Which problem causes TELNET or FTP addresses outside the local LAN to time out?

- A.the default route is incorrect
- B.the default route is undefined
- C.telnetd and ftpd on the local system are not running
- D.routed is looping

**Correct Answers: A**

5: Which program is needed when working with OSPF routing protocol?

- A.named
- B.BIND
- C.routed
- D.gated

**Correct Answers: D**

6: What action is needed to cause a Tru64 UNIX system to forward traffic between networks when it has multiple interfaces on different subnets?

- A.No action required, because Tru64 UNIX always functions as a router.
- B.Set SysMan to run the system as an IP router.
- C.Add the appropriate routes to the /etc/routes file.

D.Configure the routes to point to this Tru64 UNIX system.

**Correct Answers: B**

7: Which routing protocol interoperates with routed?

A.HELLO

B.RIP

C.EGP

D.BGP

**Correct Answers: B**

8: The command route delete default 1.2.3.4 returns the following message:

writing to routing socket: No such process

delete net default: gateway 1.2.3.4: not in table

What does the message indicate?

A.The default gateway address is not 1.2.3.4.

B.The default is in the permanent cache.

C.You do not have permission to delete the route.

D.The route daemon is not running.

**Correct Answers: A**

9: What is an SNMP trap?

A.an event sent to UDP port 162

B.a message generated by the NMS

C.an unsolicited event notifying the NMS of a change

D.an application that sits and listens for incoming information

**Correct Answers: C**

10: How many bits are in an IPv4 address?

A.8

B.16

C.32

D.64

**Correct Answers: C**
