

Vendor: Oracle

Exam Code: 1Z0-063

Exam Name: Oracle Database 12c: Advanced
Administration

Version: DEMO

QUESTION 1

You want to consolidate databases for the CRM, ERP, and SCM applications by migrating them to pluggable databases (PDBs).

You have already created a test system to support the consolidation of databases in a multitenant container database (CDB) that has multiple PDBs.

What is the easiest way to perform capacity planning for consolidation?

- A. capturing the most resource-intensive SQL statements in a SQL Tuning Set on the production system and using the SQL Performance Analyzer on the test system
- B. capturing the workload on the production system and replaying the workload for one PDB at a time on the test system
- C. capturing the workload on the production system and using Consolidated Database Replay to replay the workload of all production systems simultaneously for all PDBs
- D. capturing the most resource-intensive SQL statements in a SQL Tuning Set on the production system and using the SQL Tuning Advisor on the test system

Answer: D

QUESTION 2

A complete database backup to media is taken for your database every day. Which three actions would you take to improve backup performance?

- A. Set the backup_tape_io_slaves parameter to true.
- B. Set the dbwr_io_slaves parameter to a nonzero value if synchronous I/O is in use.
- C. Configure large pool if not already done.
- D. Remove the rate parameter, if specified, in the allocate channel command.
- E. Always use RMAN compression for tape backups rather than the compression provided by media manager.
- F. Always use synchronous I/O for the database.

Answer: BCD

QUESTION 3

Evaluate these statements:

```
CREATE TABLE purchase_orders
(po_id NUMBER(4),
po_date TIMESTAMP,
supplier_id NUMBER(6),
po_total NUMBER(8,2), CONSTRAINT order_pk PRIMARY KEY(po_id))
PARTITION BY RANGE(po_date)
(PARTITION Q1 VALUES LESS THAN (TO_DATE('01-apr-2007','dd-mon-yyyy')),
PARTITION Q2 VALUES LESS THAN (TO_DATE('01-jul-2007','dd-mon-yyyy')),
PARTITION Q3 VALUES LESS THAN (TO_DATE('01-oct-2007','dd-mon-yyyy')),
PARTITION Q4 VALUES LESS THAN (TO_DATE('01-jan-2008','dd-mon-yyyy')));
CREATE TABLE purchase_order_items
(po_id NUMBER(4) NOT NULL,
product_id NUMBER(6) NOT NULL,
unit_price NUMBER(8,2),
quantity NUMBER(8),
CONSTRAINT po_items_fk
FOREIGN KEY(po_id) REFERENCES purchase_orders(po_id))
PARTITION BY REFERENCE(po_items_fk);
```

Which two statements are true?

- A. Partitions of purchase_order_items are assigned unique names based on a sequence.
- B. The purchase_orders and purchase_order_items tables are created with four partitions each.
- C. purchase_order_items table partitions exist in the same tablespaces as the purchase_orders table partitions.
- D. The purchase_order_items table inherits the partitioning key by duplicating the key columns from the parent table.
- E. Partition maintenance operations on the purchase_order_items table require disabling the foreign key constraint.

Answer: CE

QUESTION 4

Which two resources might be prioritized between competing pluggable databases (PDBs) when creating a multitenant container database (CDB) plan using Oracle Database Resource Manager?

- A. maximum undo per consumer group
- B. maximum idle time for a session in a PDB
- C. parallel server limit
- D. CPU
- E. maximum number of sessions for a PDB

Answer: CD

QUESTION 5

Which three statements are true about the SQL*Loader utility?

- A. It can be used to load data from multiple external files into multiple tables.
- B. It can be used to extract and reorganize data from external files, and then load it into a table.
- C. It can be used to load data from external files using direct path only.
- D. It can be used to create tables using data that is stored in external files.
- E. It can be used to generate unique sequential values in specified columns while loading data.

Answer: ADE

QUESTION 6

You are administering a multitenant container database (CDB). Identify two ways to access a pluggable database (PDB) that is open in read-only mode.

- A. by using the connect statement as a local user having only the set container privilege
- B. by using easy connect
- C. by using external authentication
- D. as a common user with the set container privilege
- E. by executing the alter session set container command as a local user

Answer: AD

QUESTION 7

Your database is running in archive log mode and Automatic Undo Management is enabled. Which two tasks should you perform before enabling Flashback Database?

- A. Enable minimal supplemental logging.
- B. Ensure that the `db_flashback_retention_target` parameter is set to a point in time (in minutes) to which the database can be flashed back.
- C. Enable the recyclebin.
- D. Enable undo retention guarantee.
- E. Enable Fast Recovery Area.

Answer: AC

QUESTION 8

Examine the backup requirement for your company:

- 1) Every Sunday, a backup of all used data file blocks is performed.
- 2) Every Wednesday and Friday, a backup of all the changed blocks since last Sunday's backup is performed.
- 3) On all the other days, a backup of only the changed blocks since the last day's backup is performed.

Which backup strategy satisfies the requirements?

- A. level 0 backup on Sunday, cumulative incremental backup on Wednesday and Friday, and differential incremental level 1 backup on all the other days
- B. level 0 backup on Sunday, differential incremental backup on Wednesday and Friday, and cumulative incremental level 1 backup on all the other days
- C. full database backup on Sunday, level 0 backup on Wednesday and Friday, and cumulative incremental level 1 backup on all the other days
- D. full database backup on Sunday, level 0 backup on Wednesday and Friday, and differential incremental level 1 backup on all the other days

Answer: B

QUESTION 9

You restore and recover your database to a new host by using an existing RMAN open database backup.

Which step must you perform next?

- A. Execute `catproc.sql` to recompile invalid PL/SQL modules.
- B. Open the database with the `resetlogs` option.
- C. Set a new database identifier (DBID) for the newly restored database.
- D. Use the RMAN `set newname` and `switch` commands to switch to new files.

Answer: A

Thank You for Trying Our Product

PassLeader Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
