

**Vendor:** Microsoft

**Exam Code:** MB6-894

**Exam Name:** Development, Extensions and Deployment for  
Microsoft Dynamics 365 for Finance and Operations

**Version:** 18.021

### QUESTION 1

You are an Independent Software Vendor (ISV) developer.

You are working on a new solution that will support multiple languages and regions, and you need to use labels.

Which two best practices should you follow when using the labels? Each correct answer presents a complete solution.

- A. Use descriptive text for the label file ID.
- B. Use labels for elements and artifacts.
- C. Use the name of the model for the label file name.
- D. Use a new label ID for every element or artifact.

**Answer:** BC

**Explanation:**

You should use labels for every user-facing element or artifact in Dynamics 365 for Finance and Operations.

For multi-language label files, you should ensure that labels contain appropriate translations of the activity or item that they describe.

You should also use labels when programming for all external strings. You should create a label file with the same name as the associated model.

### QUESTION 2

You are a developer working on a new customized form and are troubleshooting a defect on the form.

The form displays a summary for each line. The defect report says that the form shows the incorrect summary for return order lines.

A display method provides the summary, and the method calls the following:

```
public str salesLineSummary(  
SalesType _type,  
str _orderNum,  
ItemId _itemId,  
Qty _lineQty,  
Amount _lineAmount  
)  
{  
Amount baseAmount = _lineAmount > 0 ? _lineAmount : -1 * _lineAmount;  
str formattedAmount = num2Str(baseAmount, 10, 2, DecimalSeparator::Dot,  
ThousandSeparator::Comma);  
str summary;  
switch (_type)  
{  
case SalesType::Sales:  
summary = strFmt('Order %1 ordered %2 of %3 [Subtotal: %4]',  
_orderNum, _lineQty, _itemId, formattedAmount);  
break;  
case SalesType::ReturnItem:  
summary = strFmt('RMA %1 expecting %2 of %3 for %4 credit',  
_orderNum, _lineQty, _itemId, formattedAmount);  
default:  
summary = strFmt('Journal %1: %2 of %3', _orderNum, _lineQty,  
_itemId);  
}
```

```
}  
return summary;  
}
```

You need to fix the defect in the most efficient way possible.

Which modification should you make?

- A. Remove the default block of code from the switch statement.
- B. Add an If statement to the default block of code in the switch statement.
- C. Exchange theSalesType::Saleswith theSalesType::ReturnItemblocks of code in the switch statement.
- D. Add a break statement before the default block of code in the switch statement.

**Answer: D**

### QUESTION 3

You create a new retail server API for a Cloud point-of-sale (POS) solution in Microsoft Dynamics 365 for Retail.

You need to register your new retail server extension.

Which file should you update?

- A. Retail Store Front web.config
- B. Retail Server web.config
- C. Retail Cloud POS web.config
- D. AOS Service web.config

**Answer: B**

### QUESTION 4

Your development team plans to use the new API exposed in Commerce Runtime (CRT) to set/get or validate values based on enum type.

Which two benefits will your team gain from using the new API in this manner? Each correct answer prescribes a complete solution.

- A. They can directly map between Finance and Operations enums and CRT enums without manually creating the enums in CRT.
- B. They can easily override or add triggers at specific extension points instead of owning the entire service or operation.
- C. They can help skip certain checks used to override the entire calculate service by adding pre/post triggers for the validation check.
- D. They can have multiple partners and ISVs create extensible enums and use them independently without any code merge.

**Answer: AD**

#### **Explanation:**

With the new extensible enum exposed in CRT, you can directly map between Finance and Operations enums and CRT enums without manually creating the enums in CRT. Multiple partners and ISVs can create extensible enums and use them in their code independently without

any code merge.

#### QUESTION 5

Employees who use a Cloud point-of-sale (POS) at a store report that the product information is not current. There is no Retail Store Scale Unit deployed at the store, and you suspect that the scheduler job that updates product information has failed.

Which two actions can you take to check the status of the scheduler job? Each correct answer presents a complete solution.

- A. In Event Viewer, look at the Commerce-RetailServer event log for an event that references the job.
- B. In Lifecycle Services (LCS), look in Environment monitoring, and search Activity for the batch job that includes the scheduler job.
- C. In Retail's Headquarters, look at the history of the distribution schedule that includes the scheduler job.
- D. In the Cloud POS, look at the Database connection status screen for the job.

**Answer:** BC

**Explanation:**

Retail distribution jobs use the commerce data exchange async server and the retail scheduler. The components of messages, environments, and jobs are all collected and surfaced up to LCS to provide a one-stop overview of diagnostics and monitoring.

#### QUESTION 6

You are an Independent Software Vendor (ISV) developer working in the "ABCModule" module in an existing solution.

You create a new label in the XYZ-en-US.label.txt file with a Label ID of "LabelText", a Label of "Text for the Label", and a Description of "ABC".

How should you reference this new label in the Label property of an artifact?

- A. @ABCModule.XYZ.LabelText
- B. @XYZ:LabelText
- C. @ABCModule.XYZ[LabelText]
- D. @XYZ[LabelText]

**Answer:** B

## Thank You for Trying Our Product

### Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
