Vendor: Microsoft

Exam Code: MB-700

Exam Name: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect

Version: DEMO

QUESTION 1
A company needs to create customer-facing documents in Dynamics 365 Finance.

The company does not have an in-house developer.

You need to determine a solution for creating the documents.

Which three tools should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. SSRS reports
B. Microsoft Excel
C. Electronic reporting
D. Microsoft Word
E. Financial reports

Answer: BCD
Explanation:
The Electronic reporting engine is targeted at business users instead of developers. Because you configure formats instead of code, the processes for creating and adjusting formats for electronic documents are faster and easier.

QUESTION 2
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company with multiple legal entities implements Dynamics 365 Finance.

You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.

Solution: Create separate business units.

Does the solution meet the goal?

A. Yes
B. No

Answer: A
Explanation:
https://docs.microsoft.com/en-us/dynamics365/finance/general-ledger/generating-consolidated-financial-statements

QUESTION 3
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a

---

correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company with multiple legal entities implements Dynamics 365 Finance.

You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.

Solution: Create separate cost centers to manage operations.

Does the solution meet the goal?

A. Yes
B. No

Answer: B

QUESTION 4
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company with multiple legal entities implements Dynamics 365 Finance.

You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.

Solution: Create separate departments to manage functional areas.

Does the solution meet the goal?

A. Yes
B. No

Answer: B
Explanation:
https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/organization-administration/plan-organizational-hierarchy

QUESTION 5
A company is headquartered in Canada and has four regional offices in Japan, Great Britain, Germany, and Mexico.

An architect is documenting the following business requirements:

- Accounts payable parameters must be unique within an organization.
- Monthly financial results must be consolidated.

You need to design the organization to map to the requirements.

Which functionality should you use?

A. Legal entities
B. Line of business
C. Business units
D. Operating units

Answer: A
Explanation:
Since having Separate parameters for each org is only possible by separate legal entities.

QUESTION 6
A local community college uses Microsoft SharePoint Online to track and manage laptop computers that are issued to faculty and other employees.

Information about all laptops must be visible in Asset Management for Dynamics 365 Supply Chain Management. Users must be able to issue new laptop computers to faculty and other employees directly from the system.

You need to recommend a solution for the college.

Which two actions should you recommend? Each correct answer provides a complete solution.

NOTE: Each correct selection is worth one point.

A. Implement data management.
B. Implement human resources.
C. Embed PowerApps into the Employees form.
D. Implement fixed assets.

Answer: BC
Explanation:
https://dynamics365.wordpress.com/tag/embedded-powerapps/

QUESTION 7
An organization is planning a new Dynamics 365 Finance + Operations (on-premises) implementation.

The business process demands a huge volume of transactions to be imported during peak hours. Users can always access the system.

You need to do proper hardware sizing to ensure expected performance.

Which two factors should be considered for sizing? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. user profile management

B. business process optimization
C. deadlock log evaluation
D. crash dump analysis
E. transaction characterization

Answer: AE
Explanation:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/get-started/hardware-sizing-on-premises-environments

QUESTION 8
An organization has implemented the accounts payable module in Dynamics 365 Finance.

Corporate policy specifies the following:

```
- Managers and directors are allowed to approve invoices for payment.
- Users are allowed to delegate their signing authority to other users
when they are out of the office.
- Accounts payable workflow will be used to assist in automating the
signing process.
- Users whose job has signing authority can approve invoices for
payment.
```

You need to meet the organization's corporate policy.

What should you recommend?

A. Create workflow rules.
B. Assign all jobs signing authority.
C. Create business event rules.
D. Email the delegation policy to all managers.

Answer: A

QUESTION 9
A company is implementing a Dynamics 365 environment.

The environment will be used for performance testing. Performance tests will occur at 40,000 transaction lines per hour. The environment must minimize cost.

You need to determine which tier of environment is required.

What should you recommend?

A. Tier 1
B. Tier 2
C. Tier 3
D. Tier 4
E. Tier 5

Answer: E
Explanation:

---

https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/imp-lifecycle/environment-planning#selecting-the-correct-tier-2-or-higher-environment

QUESTION 10
An organization is planning to migrate to Dynamics 365 Finance.

The organization reports that the legacy system has failed during peak sessions.

You need to recommend an approach that will handle peak session volume.

Which two approaches should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Use performance and load testing.
B. Configure a single box development environment.
C. Perform user integration testing.
D. Optimize server configuration.

Answer: AD

QUESTION 11
You are an architect implementing a Dynamics 365 Finance environment.

You need to analyze test results generated by the development team.

Which tool should you use?

A. Trace parser
B. Task Recorder
C. Regression suite automation tool
D. SysTest

Answer: D
Explanation:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/testing-support

QUESTION 12
A company is using Dynamics 365 Finance.

You need to ensure that the production environment always uses the latest service updates from Microsoft.

What should you recommend?

A. Deploy a production environment.
B. Set update settings for continuous updates.
C. Request the update through a service request.
D. Run the code upgrade service to analyze the code.

Answer: B

QUESTION 13
You are preparing a proof of concept environment using Dynamics 365 Finance.

You need to analyze the results generated from the Regression suite automation tool (RSAT).

Which Lifecycle Services tool should you use to store the RSAT testing files?

A. Asset library
B. Business process modeler
C. Usage profiler
D. Methodologies

Answer: B
Explanation:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/asset-library

QUESTION 14
A client is implementing Dynamics 365 Finance.

You need to determine a testing solution to validate performance of critical business processes in the organization.

Which two tools should you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Task Recorder
B. SysTest
C. PerfSDK
D. Regression suite automation tool

Answer: AC
Explanation:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/single-user-test-perf-sdk

QUESTION 15
A company is implementing Dynamics 365 Finance.

A series of related data packages must be migrated.

You need to define the sequence of the data packages migration.

Which Lifecycle Services tool should you use?

A. Solution management
B. Business process modeler
C. Process data package in the Asset library

D. Software deployable package in the Asset library.

Answer: C
Explanation:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lcs-solutions/process-data-packages-lcs-solutions

QUESTION 16
You are a Dynamics 365 Finance developer. You have a virtual machine that includes Visual Studio. You need to display the elements by model. What should you do?

A. Select Metadata Search from the Dynamics 365 menu.
B. Select Model Management from the menu and then select View all package dependencies
C. Right-click the Application Object Tree (AOT) node in Application Explorer and select Model View.
D. Select Model Management from the menu and then select Refresh Models.

Answer: A

QUESTION 17
A company uses a legacy finance application that runs on a single SQL Server instance. The company plans to implement Dynamics 365 Finance. The following table describes the current implementation and design decisions for the new implementation:

Feature	Current application	Dynamics 365 implementation
Business logic	Business logic is implemented as stored procedures in SQL Server.	Business logic will be implemented as Power Automate flows.
Data	Data is stored in SQL Server tables.	Data will be imported by using Dynamics 365 APIs.
Reports	Reports are stored in SQL Server Reporting Services.	Reports will be recreated by using Power BI.
User Interface	HTML markup for the user interface is stored as text values in SQL Server.	HTML markup for the user interface will be migrated directly by using FetchXML queries.
Users	Users are configured as SQL Server user account.	Users will be configured as Office 365 user accounts.

You need to identify the gap in the migration plan.

Which requirement should you identify as a gap?

A. Business logic
B. Users
C. User Interface
D. Reports
E. Data

Answer: C
