**Exam Name:** HCIA-Access V2.5

**Version:** DEMO

#### QUESTION 1

What protocol does the FTP protocol run on?

- A. UDP
- B. TCP
- C. IP
- D. ARP

**Answer: B**

#### QUESTION 2

Which of the following statements is true?

- A. Compared with the shared hub, a port of the LAN switch can be said to be a separate collision domain.
- B. When the LAN Switch receives a packet containing an unrecognized MAC address, it directly sends the packet back from the port it received.
- C. The LAN Switch may not recognize the MAC address, but must recognize the IP address.
- D. The LAN Switch mainly searches for the corresponding IP address according to the MAC address of the data packet to realize the forwarding of the data packet.

**Answer: A**

#### QUESTION 3

When the Access port of the Ethernet switch receives a packet with a tag, which of the following processing behavior is correct?

- A. When the VLANID is the same as the default VLANID, the packet is received.
- B. Strip the frame's PVID Tag first, and then receive it.
- C. When the VLANID is different from the default VLANID, the packet is received.
- D. Receive the message and tag it with the default VAN.

**Answer: A**

#### QUESTION 4

Which of the following options can effectively reduce the size of routing table entries?

- A. Deploy BFD to accelerate network monitoring
- B. Route Aggregation
- C. Divide VLAN
- D. Increase the update frequency of dynamic routing

**Answer: B**

#### QUESTION 5

Based on the principle of high board versatility, the MA5800 can use the service board of the MA5608T.

- A. TRUE

B. FALSE

**Answer: A**

**QUESTION 6**

After the GEM Port bears the service, it must be mapped to the T-CONT unit for uplink service scheduling. Each ON supports multiple T-CONT, and can select different types of T-CONT according to different service types.

- A. TRUE
- B. FALSE

**Answer: A**

**QUESTION 7**

In the downstream direction of GPON, due to the broadcast mode, all ONU can receive the same data, and in the upstream direction, due to the same optical splitter, the data of one branch fiber can also be received by another branch fiber.

- A. TRUE
- B. FALSE

**Answer: B**

**QUESTION 8**

A GEM Port can carry one type of service or multiple services.

- A. TRUE
- B. FALSE

**Answer: A**

**QUESTION 9**

The downlink wavelengths in the 10G GPON system are?

- A. 1490nm
- B. 1577nm
- C. 1270nm
- D. 1310nm

**Answer: B**

**QUESTION 10**

In the EPON system, the function of the GATE frame is to allow the ONU receiving the GATE frame to send data immediately or within a specified time period.

- A. TRUE
- B. FALSE

**Answer: A**

**QUESTION 11**

In the process of PPPoE dialing, which message indicates that the session ID is obtained?

- A. PADS
- B. PADI
- C. PADO
- D. PADR

**Answer: A**

**QUESTION 12**

When the PC obtains an IP address through DHCP, the gratuitous ARP packet will be used to detect whether the allocated IP is occupied. Among the following options, which of the following options is correct about the time point when the gratuitous ARP packet is sent?

- A. After the PC receives the ACK message from the server, it sends gratuitousARP to check whether there is an IP conflict.
- B. When the PC sends the DHCP Request message, it sends gratuitousARP to detect whether there is an IP conflict.
- C. Before sending the offer message, the DHCP server sends gratuitousARP to check whether there is an IP conflict.
- D. After the PC receives the offer message from the server, it sends gratuitousARP to check whether there is an IP conflict.

**Answer: A**

**QUESTION 13**

When the address of the DHCP client reaches a certain lease period, the address lease operation will be performed. During each lease renewal process, the number of times of sending the renewal message will decrease with the increase of the number of address lease renewals.

- A. TRUE
- B. FALSE

**Answer: B**

**QUESTION 14**

The VLAN switching plan of the Internet service in a project adopts the translate method, and the C-VLAN ID and S-VLAN ID need to be consistent during planning.

- A. TRUE
- B. FALSE

**Answer: B**

**QUESTION 15**

Generally speaking, the following configuration is recommended for network management VLAN.

```
Vlan 350 smart
Vlan desc 350 description "Manage"
Port vlan 350 0/8 0
```

- A. TRUE
- B. FALSE

**Answer:** A

#### QUESTION 16

There is one MA/EA5800-X7 device with only one main control board. It is necessary to check the software version of its main control board. Which of the following commands is correct?

- A. display version 0/8
- B. display version 0/10
- C. display version 0/7
- D. display version 0/6

**Answer:** A

#### QUESTION 17

Which of the following commands can be used to set the terminal timeout and exit time?

- A. Display interface
- B. idle-time out
- C. Display board
- D. system name

**Answer:** B

#### QUESTION 18

During normal operation and maintenance, you can run the display ont info command to query the "Run state" of the ONT. Which of the following states shows that the ONT is online?

- A. active
- B. online
- C. to match
- D. offline

**Answer:** B

## Thank You for Trying Our Product

### Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
