Vendor: Huawei

Exam Code: H13-831_V2.0

Exam Name: HCIE-Cloud Service Solutions Architect (Written) V2.0

Version: DEMO

QUESTION 1
In the basic development of microservices, when the consumer calls the provider service and reports an error, the exception message is that the provider service cannot be found. What are the possible reasons? (Multiple choice)

A. The environment of consumer service and provi der service is different.
B. There is no instance record of provi der service in the service center.
C. The service center has no record of provider service.
D. The PPLCATION ID of consumer service and provi der are different.

Answer: ABCD

QUESTION 2
An e-commerce website is bound to experience a sudden increase in traffic during the promotion season. When the existing resources are insufficient, you can choose to close or abandon some unimportant and poor-performance services to avoid occupying resources. In order to ensure that the main business functions are normal, which of the following microservice governance methods is implemented by this mechanism?

A. Load balancing
B. Fault tolerance:
C. Current limit
D. Downgrade

Answer: D

QUESTION 3
Regarding the description of the relationship between HUAWEI CLOUD MRS service and other HUAWEI CLOUD services, which of the following options are correct? (Multiple choice)

A. MRS in the Hive, MapReduce, YARN support export data to OBS in
B. MRS cluster metadata, user billing information and other system operating data can be stored in the RDS relational database.
C. MRS in the Spark, Flume and Loader supported from OBS import data.
D. Huawei cloud grade S per cluster - node is an ECS elastic cloud server.

Answer: ABCD

QUESTION 4
Which of the following components is suitable for storing structured column-oriented large table data?

A. Zookeeper
B. Kafka
C. MySQL
D. Hbase

Answer: D

QUESTION 5
For scenarios where the user business needs to store billions of rows and millions of columns of large table data, and real-time level read and write access to the large table data, which of the following big data components can be used?

A. HDFS
B. Hive
C. Hbase
D. YARN

Answer: C

QUESTION 6
In the big data offline processing scheme architecture, the batch processing engine is used to achieve high-performance offline batch processing job operation. Which of the following HUAWEI CLOUD big data offline batch processing engines can be used to process SQL jobs?

A. Spark
B. Hive
C. Spark SQL
D. MapReduce

Answer: C

QUESTION 7
What is the default scheduling mode of Spark Jab?

A. Specify at runtime
B. FAIR
C. FIF0
D. LIFO

Answer: C

QUESTION 8
HUAWEI CLOUD big data processing platform usually uses the tags of computing resources and storage resources together to realize the support of heterogeneous devices in the Hadoop cluster. The following description of the effects of these two scheduling strategies, which one is wrong?

A. Through the computing resource label, Spark jobs can be scheduled to run on large memory nodes, while MR job scheduling runs on standard memory nodes
B. The tags of computing resources and storage resources are usually used together to allow designated applications to access computing and data resources across nodes.
C. Through the storage resource label, online application data can be stored in the HDFS directory of the SAS disk node, and offline application data can be stored in the HDFS directory corresponding to the SATA disk node.
D. Computing resource label scheduling is a feature of Yarm, and storage resource scheduling is a feature of HDFS.

Answer: B

QUESTION 9
If the user needs to pass the three-level certification, the final evaluation score must be greater than or equal to which of the following scores?

A. 75
B. 80
C. 70
D. 60

Answer: A

QUESTION 10
Which of the following options is the workflow for level protection?

A. System grading > System filing > Construction rectification > Level evaluation
B. System grading > Construction rectification > System filing > Level evaluation
C. System Filing > System grading > Construction Rectification > Level Evaluation
D. System filing > System rectification > Level evaluation > System grading

Answer: A

QUESTION 11
Which of the following options does Huawei Cloud Database Security Service support for protection? (Multiple choice)

A. Examples of distributed database middleware
B. RDS cloud service instance
C. Self-built database under the cloud
D. Containerized database on the cloud

Answer: ABC

QUESTION 12
If the database instance of a Huawei Cloud tenant is under an unknown attack, which of the following methods is recommended for the tenant administrator to complete the creation of the database firewall policy?

A. Learning mode
B. Database firewall
C. Cannot automatically create security policies for existing attacks.
D. Risk-based IPS/IDS

Answer: A

QUESTION 13
In order to prevent tenants from suffering losses due to virtual machine escape attacks, which

type of cloud service does Huawei recommend that tenants purchase?

A. Cloud Fortress
B. Container Security Service
C. Dedicated Host
D. Enterprise host security

Answer: D

QUESTION 14
A certain company's business is often attacked by foreign countries, Hong Kong, Macau, Taiwan and China, and it is found through analysis.
1: Foreign, Hong Kong, Macao and Taiwan attack traffic accounted for 90%, and domestic attack traffic accounted for 10%.
2: Effective visit traffic from foreign countries, Hong Kong, Macao and Taiwan accounted for 5%, and domestic effective visit traffic accounted for 95%.
Therefore, the company's management decided that foreign, Hong Kong, Macao and Taiwan users will follow up to visit the company's business through the new domain name. Which of the following options can quickly and effectively help this company block attacks or access to the original domain name by traffic from foreign countries, Hong Kong, Macao and Taiwan?

A. DDOS high defense
B. VNGFW
C. Network ACL
D. Anti-DdoS

Answer: A

QUESTION 15
A company has deployed a public-facing forum through Huawei Cloud. In order to avoid Cc attacks on registered accounts, the company puts forward the following two requirements to forum administrators.

Requirement 1: Login protection, only 3 attempts to log in within five minutes are allowed, more than 3 times will prevent them from logging in again within 1 hour.
Requirement 2: Web search, a single user searches the page no more than 30 times in one minute, if it exceeds 30, the verification code will be verified.

In response to the above requirements, which features of DDOS can be used by tenants to complete the above requirements?

A. Requirement 1: (path: prefix matching /search*) + (speed limit mode: user speed limit) + (protection action: man-machine verification)
B. Requirement 1: (path, exact match /login. php) + (speed limit mode: IP speed limit) + (protection action: block)
C. Requirement 2: (path, prefix matching /search*) + (speed limit mode: user speed limit) + (protection action: man-machine verification)
D. Requirement 2: (path: exact match/ 1ogin.php) + (speed limit mode: IP speed limit) + (protection action, block)

Answer: BC

QUESTION 16
Users plan to monitor and alert the business systems deployed on HUAWEI CLOUD. The alert notification needs to be notified by email and SMS. Which cloud service of the following options should be used?

A. LTS
B. CTS
C. CES
D. SMN

Answer: D

QUESTION 17
HUAWEI CLOUD Application Operations Management (AOM) is centered on cloud applications and provides a one-stop three-dimensional operation and maintenance platform for enterprise applications.

A. TRUE
B. FALSE

Answer: A

QUESTION 18
After the customer purchases the ECS cloud server to go to the cloud, the daily monitoring and alarms of the CPU usage, memory usage, and hard disk usage in the ECS operating system should be provided by HUAWEI CLOUD with daily operation and maintenance services.

A. TRUE
B. FALSE

Answer: B

QUESTION 19
When users use HUAWEI CLOUD monitoring service CES to monitor basic resources, they need to install CES Aent to use the full monitoring function.

A. TRUE
B. FALSE

Answer: B

QUESTION 20
The following describes the affairs in APM of HUAWEI CLOUD Application Performance Management. Which options are correct? (Multiple choice)

A. The transaction in APM refers to the http transaction, which is the complete process from " user request > webserver> DB> webserver> user request ".
B. In the e-commerce application, a product query is a transaction, and a payment is also a transaction.

C. When executing a transaction, multiple calls between services may be required to complete the transaction.
D. The url is used as the name of the transaction in the APK, and the transaction name can also be customized. Easy to understand.

Answer: ABCD

QUESTION 21
After the customer's business system was put on the cloud, the customer operation and maintenance engineer discovered through CES that the memory usage of a certain ECS continued to rise every day, and it has reached 90%. Which of the following measures cannot be taken by the customer operation and maintenance engineer to solve the problem?

A. Analyze the application log, if the business volume increases, it can be solved by changing the cCS specification.
B. Analyze the application log, if you find that the application has a memory leak problem, you can modify the application code to completely solve the memory leak problem.
C. Contact Huawei engineers to help reduce ECS memory usage from the background.
D. Analyze the application log, if you find that the application has a memory leak problem, you can restart W to temporarily solve it.

Answer: C

QUESTION 22
When users use HUAWEI CLOUD SMS to migrate window hosts, the basic unit of file system block (Block) is used for migration, and only valid block data is migrated to the destination server, thereby improving migration efficiency.

A. TRUE
B. FALSE

Answer: A

QUESTION 23
When customers use HUAWEI CLOUD SKS for host migration, the source end host is the key login, and the target end is the host created using the password login method. After the migration is completed, you can use the password to log in to the target host.

A. TRUE
B. FALSE

Answer: B

Thank You for Trying Our Product

Passleader Certification Exam Features:

★ More than **99,900** Satisfied Customers Worldwide.

★ Average **99.9%** Success Rate.

★ **Free Update** to match latest and real exam scenarios.

★ **Instant Download** Access! No Setup required.

★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.

★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.

★ **100%** Guaranteed Success or **100%** Money Back Guarantee.

★ **Fast**, helpful support **24x7**.
