

**Vendor:** Huawei

**Exam Code:** H19-402\_V1.0

**Exam Name:** HCSP-Presales-Data Center Network  
Planning and Design V1.0

**Version:** DEMO

**QUESTION 1**

What sensor does FusionModule2000 use to detect whether the air conditioner is leaking?

- A. Multifunctional sensor
- B. Infrared sensor
- C. Temperature sensor
- D. Water sensor

**Answer: D**

**QUESTION 2**

Which of the following are optional in the typical configuration of FusionModule500?

- A. PAD, SMS alarm, video, mobile APP, switch
- B. PAD, SMS alarm, video, flooding, smoke detection
- C. PAD, SMS alarm, mobile phone APP, flooding, door magnet

**Answer: A**

**QUESTION 3**

The UPS system is equipped with 32 12V batteries. What is the floating charge voltage set by the UPS?

- A. 432V
- B. 451V
- C. 540V
- D. 564V

**Answer: A**

**QUESTION 4**

Which is the fire extinguishing measures that can be adopted in Class A computer rooms?

- A. Gas fire extinguishing system
- B. Water mist fire extinguishing system
- C. Automatic sprinkler system
- D. All of the above

**Answer: A**

**QUESTION 5**

What is the output power factor of UPS2000-A-(1K-3K)?

- A. 0.7
- B. 0.8
- C. 0.9
- D. 0.99

**Answer: B**

**QUESTION 6**

Which of the following UPS does not have a neutral line?

- A. UPS5000-H
- B. UPS5000-E
- C. galaxy5000
- D. APM150

**Answer: A**

**QUESTION 7**

For cabinets (racks) arranged in rows, when their length exceeds (), additional channels should be added between two channels, and channels should be set up at both ends: when the distance between two channels exceeds (), channels should be added directly between the two channels.

- A. 6m, 15m
- B. 6m, 20m
- C. 8m, 15m
- D. 8m, 20m

**Answer: A**

**QUESTION 8**

UPS5000-E has a wide voltage and frequency input range, which can be used in harsh power grid environments and extend battery life. What is the input voltage range of UPS5000-E at full load?

- A. 138-485V
- B. 305-485V
- C. 105-485V

**Answer: A**

**QUESTION 9**

What are the maximum number of cabinets in FusionModule500 and FusionModule800?

- A. 10,6
- B. 6, 2
- C. 9,5
- D. 4, 10

**Answer: D**

**QUESTION 10**

The UPS5000-series modular UPS product features are similar to which of the following product models?

- A. Hipulse-u
- B. 8O-NET
- C. NXr
- D. APM

**Answer: D**

**QUESTION 11**

Which of the following features are standard features of NETCOL8000-C air conditioner?

- A. Dual power supply
- B. Water sensor
- C. G4 grade filter
- D. Humidification function

**Answer: C**

**QUESTION 12**

UPS5000-E 100kVA, which of the following input switches is most suitable for the machine?

- A. 125A
- B. 80A
- C. 160A
- D. 200A

**Answer: D**

**QUESTION 13**

UPS500-A-400/500K can support a maximum of ( ) parallel connections and has good scalability.

- A. 4
- B. 2
- C. 3
- D. 6

**Answer: A**

**QUESTION 14**

Assume that the discharge power specified in a battery specification is 400W@1.67V@15min, and if the system requirement is 1400W. Which of the following number of battery packs is selected?

- A. 3
- B. 4
- C. 5

**Answer: B**

**QUESTION 15**

UPS5000-A/E 400KVA and above models are divided into standard version and enhanced version. The standard version is equipped with ( ) isolation switch.

- A. Main input
- B. Bypass Input
- C. Repair
- D. Output

**Answer: C**

**QUESTION 16**

When the NetEco management system intervenes in third-party devices outside the micromodule, what kind of monitoring hardware is usually used to access it?

- A. ECC500 collector
- B. ECC800 Collector
- C. Serial port server
- D. None of the above

**Answer: A**

**QUESTION 17**

When using a single RH5885 server, how many measurement points can the NetEco management system support to achieve centralized management of multiple data centers?

- A. 20
- B. 40
- C. 50
- D. 100

**Answer: A**

**QUESTION 18**

A project requires the management system to access a third-party generator set, two smart meters (same model), and two precision air conditioners (same model). How many third-party equipment access fees does the management system need to report?

- A. 1
- B. 3
- C. 5
- D. None of the above

**Answer: B**

**QUESTION 19**

The number of batteries in traditional UPS cannot be adjusted, and the battery maintenance cost is high. If one battery is damaged, the entire battery group may need to be replaced. The number of batteries in UPS5000-A can be adjusted, so what is the adjustable range?

- A. 30-40
- B. 34-40
- C. 36-40
- D. 32-40

**Answer:** A

**QUESTION 20**

How many poles of circuit breaker are generally used for the external maintenance bypass of UPS system?

- A. 3
- B. 1
- C. 4
- D. 2

**Answer:** A

**QUESTION 21**

Huawei Technologies Co., Ltd. is compliant with GB50174-2008 standard ( ) is compliant with GB50174-2017 standard ( ).

- A. Participating units, Auditing unit
- B. Participating units, participating units
- C. Auditing unit, Auditing unit
- D. Auditing unit, Participating units

**Answer:** C

**QUESTION 22**

Which of the following are the types of channel doors of Huawei Fusionmodule2000V3.0?

- A. Sliding door
- B. Revolving Door
- C. Electric door
- D. Both

**Answer:** D

**QUESTION 23**

Which of the following is the battery type supported by UPS2000-G?

- A. VRLA
- B. Lithium battery
- C. Nickel-cadmium battery
- D. Flywheel

**Answer:** A

**QUESTION 24**

The NetEco management system adopts a large-capacity design architecture, which can support the access of massive devices and the access of up to ( ) 10,000 measurement points using a single X86 server. At the same time, the system operates smoothly and the CPU utilization rate is no higher than ( ).

- A. 50, 70
- B. 100, 70
- C. 50, 90
- D. 100, 90

**Answer: D**

**QUESTION 25**

Regarding the adjustable battery of UPS5000-E, when one battery is damaged, at least ( ) batteries need to be removed. Then set the corresponding number of batteries on the monitoring panel.

- A. 4
- B. 2
- C. 1
- D. 3

**Answer: B**

**QUESTION 26**

The Data Center Design Specification GB50174-2017 stipulates that when selecting a site, a data center using cooling should have sufficient water supply.

- A. Direct air cooling
- B. Indirect fresh air cooling
- C. Water evaporation cooling method
- D. Chilled water cooling method

**Answer: C**

**QUESTION 27**

Which of the following is the compressor type used in the new room-level air cooling?

- A. AC variable frequency compressor,
- B. Digital scroll compressor
- C. Fixed frequency compressor
- D. DC inverter compressor

**Answer: B**

## Thank You for Trying Our Product

### Lead2pass Certification Exam Features:

- ★ More than **99,900** Satisfied Customers Worldwide.
- ★ Average **99.9%** Success Rate.
- ★ **Free Update** to match latest and real exam scenarios.
- ★ **Instant Download** Access! No Setup required.
- ★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.
- ★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.
- ★ **100%** Guaranteed Success or **100%** Money Back Guarantee.
- ★ **Fast**, helpful support **24x7**.
