

**Exam Code:** COG-400

**Exam Name:** IBM Cognos 8 Planning Application

Consultant

**Vendor:** IBM

**Version:** DEMO

## Part: A

1: An administrator has created an access table in the Contributor Administration Console and an access level of HIDDEN has been specified for several D-List items. What effect will this access level have?

- A.The data for the D-List items will not be downloaded to the Contributor Web grid.
- B.The data for the D-List items will be downloaded to the Contributor Web grid but will be read-only.
- C.The data for the D-List items will be downloaded to the Contributor Web grid but will not be visible to users.
- D.The data for the D-List items will be deleted from the Contributor application.

**Correct Answers: C**

2: An application has multiple Access Tables that use different dimensions. The dimensions apply to the same cube. When the Access Tables are resolved, what level of access will the planner get?

- A.The access level will be determined by the order of the Access Tables.
- B.Multiple Access Tables cannot be applied to the same cube.
- C.The least restrictive level of access defined amongst all the Access Tables.
- D.The most restrictive level of access defined amongst all the Access Tables.

**Correct Answers: D**

3: Why would an administrator create a saved selection in the Contributor Administration Console?

- A.To use with access tables to restrict access to one or more data items
- B.To prevent synchronization from happening on the job server
- C.To use with a job server to restrict access to one or more data items
- D.To prevent cut-down models from being created

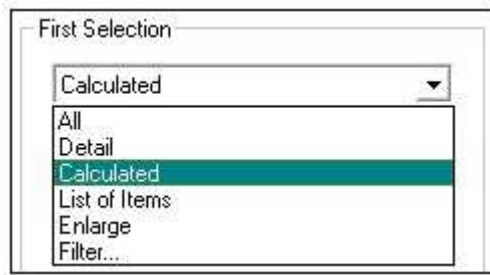

**Correct Answers: A**

4: An administrator has created an access table in the Contributor Administration Console and an access level of NO DATA has been specified for several D-List and e.List item combinations. What effect will this access level have?

- A.The D-List items will be downloaded to the Contributor Web grid and will be available to all users.
- B.The D-List items will be downloaded to the Contributor Web grid but will be read-only.
- C.The D-List items will be downloaded to the Contributor Web grid but will not be visible to users.
- D.The D-List items will be deleted from the Contributor slice for the specified e.List items.

**Correct Answers: D**

5: A saved selection has been created in the Contributor Administration Console which includes the camping equipment items from the 2 Products D-List. The administrator wants to ensure that, if more camping equipment products are added to the 2 Products D-List, the saved selection will be updated automatically. Which option should the administrator select in the First Selection box?

- A.All
- B.List of Items
- C.Filter
- D.Enlarge

**Correct Answers: D**

6: From the Contributor Administration Console using the Deployment Wizard, what can an Administrator do?

- A.Export the model structure but is unable export the data.
- B.Export the model structure and is also able to export the data.
- C.Export a Framework Manager Model but is unable to export Events.
- D.Export a Framework Manager Model and is also able to export Events.

**Correct Answers: B**
