Vendor: Adobe

Exam Code: AD0-E136

Exam Name: Adobe Experience Manager Cloud Service Migration Expert

Version: DEMO

QUESTION 1
A client's AEM environment uses a large number of custom workflows that involve deprecated functionality.
What is the most effective approach to address this during assessment?

A. Disable all custom workflows before migration
B. Review and refactor custom workflows to align with supported capabilities
C. Migrate the workflows without any modifications
D. Implement temporary solutions for unsupported features

Answer: B

QUESTION 2
Why is it essential to have a caching strategy in AEM Cloud Service migration?

A. To minimize server load and improve response times.
B. To skip caching for faster migration.
C. To automate caching without manual intervention.
D. To complicate performance optimization efforts.

Answer: A

QUESTION 3
Which step should be performed first when provisioning AEM as a Cloud Service environments?

A. Configure dispatcher rules for the production environment
B. Set up the development, stage, and production instances
C. Deploy user permissions in all environments
D. Perform initial migration of content

Answer: B

QUESTION 4
What are the primary requirements for content transfer in the context of AEM Cloud Service migration?

A. Manual transfer of content without the use of migration tools.
B. Automated migration tools and high-speed internet connectivity.
C. Compatibility between source and target AEM versions and adequate storage space.
D. Exclusive focus on transferring textual content while excluding multimedia assets.

Answer: C

QUESTION 5
After the successful go-live of AEMaaCS, what should be the primary focus of the post go-live support plan?

A. Rolling back to the previous version
B. Training new users

C. Enhancing pre-go-live documentation
D. Monitoring and addressing issues promptly

Answer: D

QUESTION 6
What steps are involved in reviewing existing components for migration?

A. Automatic migration without assessment.
B. Skipping review for faster migration.
C. Reviewing code structure only.
D. Compatibility assessment and functional testing.

Answer: D

QUESTION 7
Which configuration update is essential to align with AEM as a Cloud Service run modes?

A. Content taxonomy adjustments
B. Dispatcher flush rules optimization
C. Refactoring custom workflows
D. Updating OSGi configurations based on run modes

Answer: D

QUESTION 8
Which tool is typically used for refactoring code during the migration of custom components to AEM as a Cloud Service (AEMaaCS)?

A. AEM Dispatcher
B. Apache Sling Rewriter
C. AEM Modernizer
D. AEM Code Refactor Plugin

Answer: C

QUESTION 9
A developer is working on an AEM project for ABC Company. Which approach should the developer adopt to define specific build configurations for Cloud Service deployment?

A. Create a separate configuration file specific to Cloud Service.
B. Utilize AEM SDK Developer Tools to configure build settings locally.
C. Manually edit POM file for build configurations.
D. Use environment variables defined by AEM Cloud Service in the POM file.

Answer: B

QUESTION 10

What should be prioritized when preparing a configuration for Asset Microservices?

A. Configuring custom workflows for metadata updates
B. Enabling synchronous asset replication
C. Defining asset renditions and processing profiles
D. Automating dispatcher cache invalidation

Answer: C

QUESTION 11
When deploying updates to AEM as a Cloud Service, what should be prioritized?

A. Immediate deployment in the production environment
B. Deployment through the Cloud Manager pipeline to staging first
C. Manual migration of updated content
D. Direct dispatcher rule updates without testing

Answer: B

QUESTION 12
What is the purpose of configuring Cloud Manager pipelines during deployment?

A. To automate the migration of deprecated workflows
B. To build, test, and deploy AEM applications across environments
C. To validate user permissions in the production environment
D. To manage dispatcher cache invalidation rules

Answer: B

QUESTION 13
What is the primary purpose of executing Custom UI Tests in AEMaaCS?

A. To minimize the impact on customer experience
B. To capture critical UI tests for risk control
C. To exclude Docker images in the testing process
D. To maximize the number of tests

Answer: B
