Vendor: Hitachi

Exam Code: HQT-6741

Exam Name: Hitachi Vantara Qualified Professional - Hitachi Ops Center Administration

Version: DEMO

QUESTION 1
Which of the following are key benefits of implementing Adaptive Data Reduction (ADR) in storage systems? (Choose two)

A. Enhanced data security through advanced encryption
B. Reduced storage space requirements through data deduplication
C. Improved data access speeds
D. Lowered storage costs due to more efficient use of storage resources

Answer: BD

QUESTION 2
Host Group configurations are essential for what reason?

A. They prevent unauthorized access to the physical storage devices
B. They designate the physical location of storage devices within the data center
C. They are required for all storage arrays to function correctly
D. They allow for the logical grouping of hosts that share similar storage access patterns, simplifying volume management

Answer: D

QUESTION 3
Which CLI command can be used to create a self-signed certificate for SSL connection that uses the RAID Agent services in Ops Center Analyzer?

A. htmssltool
B. htmcerttool
C. htmkeytool
D. htmsslcert

Answer: A

QUESTION 4
What advantage does utilizing VSMs within Hitachi Ops Center Administrator offer for multi-tenant environments?

A. It enables the creation of isolated and secure virtual storage environments for each tenant.
B. It provides enhanced network speeds for data transfer between tenants.
C. It allows for the physical separation of tenants' data on different devices.
D. It offers a unified billing system for all tenants based on their storage usage.

Answer: A

QUESTION 5
What is the name of the REST-based API that provides full management programmability and control for Hitachi Ops Center Administrator?

A. Ops Center API

B. Ops Center Administrator REST API
C. Ops Center Administrator API
D. Ops Center REST API

Answer: B

QUESTION 6
In Hitachi Ops Center Administrator, ___ is a feature that allows for the synchronization of data across different locations to ensure high availability.

A. Local replication
B. External migration
C. High availability replication
D. Internal migration

Answer: C

QUESTION 7
In the context of Hitachi Ops Center Administrator, managing a VSM involves which of the following tasks?

A. Installing physical drives into the storage system
B. Programming new firmware for physical storage devices
C. Manually cooling the storage system to prevent overheating
D. Configuring virtual storage pools and allocating resources to hosts

Answer: D

QUESTION 8
How does the VSP 5000 series support business continuity?

A. By offering a single controller model for simplified management
B. Through advanced replication and data protection features
C. By utilizing legacy networking protocols for compatibility
D. Through manual snapshot and cloning processes

Answer: B

QUESTION 9
Which type of pool can be selected for creating a volume if the storage system has available capacity from external storage?

A. Tiered pool
B. DDM pool
C. Thin pool
D. External pool

Answer: D

QUESTION 10
Which of the following is necessary to successfully use the REST API with Hitachi Ops Center Administrator?

A. Authentication credentials for secure access
B. Knowledge of HTML and CSS for interface customization
C. An active internet connection to access the public API
D. A physical connection to the storage device

Answer: A

QUESTION 11
How can pools be utilized in storage management?

A. To increase the physical storage capacity of a disk
B. To organize disks into a hierarchical structure for better management
C. To group storage resources for more efficient allocation
D. To encrypt data stored on disk

Answer: C

QUESTION 12
For advanced monitoring, Hitachi Ops Center Administrator allows the creation of custom alerts based on which criteria?

A. Color scheme changes in the GUI
B. Thresholds for performance metrics
C. The phase of the moon
D. Predictions of future storage needs based on past trends

Answer: B

QUESTION 13
In the context of Hitachi Ops Center Administration, managing a VSP E Series system would typically involve which of the following tasks?

A. Optimizing flash storage performance
B. Implementing software-defined networking
C. Configuring mainframe connectivity
D. Regularly replacing HDDs with SSDs

Answer: A

Thank You for Trying Our Product

Lead2pass Certification Exam Features:

★ More than **99,900** Satisfied Customers Worldwide.

★ Average **99.9%** Success Rate.

★ **Free Update** to match latest and real exam scenarios.

★ **Instant Download** Access! No Setup required.

★ Questions & Answers are downloadable in **PDF** format and **VCE** test engine format.

★ Multi-Platform capabilities - **Windows, Laptop, Mac, Android, iPhone, iPod, iPad**.

★ **100%** Guaranteed Success or **100%** Money Back Guarantee.

★ **Fast**, helpful support **24x7**.
